Paid Summer Undergraduate Internships Available at Sandia's Combustion Research Facility in Livermore, California

10 week appointments

May – August

Requirements

U.S. citizen; undergraduate or community college student; math, physical science, or engineering major; and min GPA of 3.2/4.0

***Apply online** (Select Sandia as host institute, Application deadline of January 10, 2014)*

Undergraduate: *http://science.energy.gov/wdts/suli/*

Community College: *http://science.energy.gov/wdts/cci/*

Focal areas of research

Liquid fuel combustion, chemical kinetics, molecular spectroscopy, turbulent flame dynamics, atmospheric monitoring, combustion simulation and modeling, mathematical and computational tools for uncertainty quantification, stochastic modeling, hydrogen energy systems, and coal combustion and gasification
